

SOLVED ISSUES OF YOUR BUSINESS:

- **Energy consumption up to 40% less with using Energy Management Software**
- **Reducing CAPEX/OPEX towards smart metering approach**
- **Analytics for energy resource forecasting and planning**
- **Reducing accidents and improve fault tolerance and system reliability**
- **One platform for operations and control of object's energy resources**
- **Load shedding and restricting Peak Demands**

WHY CENTO?

1. Worldwide experienced experts with more than 40 systems implemented
2. Zero-coding user's algorithms through web interface
3. Software licenses unlimited
4. One platform - many functions available
5. XaaS or onsite installation
6. Visibility oriented web-interface
7. Focus on sustainability and digital trends
8. Technological partner of SATEC Inc.

WHAT CENTO OFFERS:

- Energy Resources Control and Operation Systems with power grid mode calculation
- Power Metering and Power Quality Solutions
- BMS (Buildings Management Systems)
- Control systems for electricity and technological parameters
- Condition and assets monitoring systems
- Metering and monitoring emissions and discharges
- Demand-Response Control by Software algorithms

MARKET'S SEGMENTS:

- Power industry and utility
- Oil and gas (down- and up-stream)
- Mining&Metal manufactures
- Production plants, F&B manufactures
- P&P plants
- Data centers
- Industrial Malls
- Business Centers
- Any industry with distributed network consumers or loads

>100 software developers and engineers

>6 countries of implementation

>8 verticals are in reference

>18 years of experience in energy and industry sectors
